

WR-1

Progressive technology in a smart retro design: that's the WR-1 AM/FM radio in a nutshell. The MDF case in walnut or black is, at first glance, modest in its proportions. Don't let this fool you - the speaker produces amazingly full and warm sound which travels a considerable distance. Thanks to the dynamic bass compensation, this guarantees a rich bass sound. An excellent sound system which also allows the connection of external sources (such as a portable CD player, for example). This 7-watter has an internal (and if desired, an external) FM antennae and 'classic' dials which allow for extreme fine-tuning. Small-scale precision and technology that produce big results.

model	WR-1
radio	AM/FM 2-band radio
frequencies	FM: 87.50 - 108 MHz AM: 520-1710 kHz
cabinet	walnut
dynamic bass compensation	yes
external FM/AM antennae	yes
analogue tuner	yes
digital tuner	-
amplifier power	7 W
driver	3"
aux-input	yes
rec-output	-
microphone input	-
headphone connection	yes
battery	-
power supply	230 V
dimensions (W x H x D)	240 x 114 x 169.5
weight	2.35 kg
colour	walnut/black
